

## **Viатris Statement on its Policy Against the Use of Viатris Products in Capital Punishment**

Viатris is dedicated to upholding the highest standards of quality and integrity in everything we do.

Viатris only distributes its products through legally compliant channels. All of its products are intended for prescription by healthcare providers consistent with approved labeling and applicable medical standards of care.

No Viатris products are approved for, labeled for, or marketed for use in lethal injections. Viатris does not distribute products that could be so used to prisons, nor does the company condone its products being distributed by any third party for use outside of the approved labeling or applicable standards of care.

Viатris has taken steps to prevent the misuse of its products. Specifically, Viатris has implemented restricted distribution protocols for certain products to help preclude their unauthorized use for capital punishment.

Our distribution restrictions limit the sale of such products to a select group of direct customers and prohibit their resale to correctional facilities for use in lethal injections or to any other unauthorized purchasers. Customers have been informed that if they do not comply with these restrictions, Viатris will no longer supply them with these products.

Viатris takes this matter seriously and will continue to work with distributors and other interested parties to ensure that its products are used appropriately.
