Products

Noncommunicable diseases (NCDs) are the leading cause of death and disease burden worldwide, accounting for 41 million deaths each year, which is equivalent to 71% of all deaths globally.¹ According to the data released by the World Health Organization (WHO) in 2018, NCDs account for about 74% of all deaths in Malaysia.² Alarming, it is estimated that 6.4 million people in Malaysia are living with hypertension, 8 million with hypercholesterolaemia and 3.8 million with obesity.³

We believe that every patient should have access to and choice over the treatment they need. That is why we offer a broad range of medicines, across multiple therapeutic categories and dosage formats. Whether it is in the dispensary, hospital or retail pharmacy, we have solutions to meet your healthcare needs.

Branded

We offer a carefully tailored selection of branded medicines. Our branded medicines offer treatment of various medical conditions and cater to unique therapeutic needs. The areas within which we specialise are:

- Primary Care
- Cardiovascular
- Pain
- Urology
- Central Nervous System
- Ophthalmology
